## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-9, drawn to a method of manufacturing a semiconductor device, classified in class 438, subclass 113.
  - II. Claim 10-20, drawn to a semiconductor device, classified in class 257, subclass 723.
2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product in claim 10 can be made by another and materially different process such as dicing the wafer prior to the bonding step. Also, the product in claims 11 and 18 can be made by another and materially different process ~~such~~ that does not require a dicing step.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
